Brilliant storyVon Hoener, BirgitAn electro-magnetic pulse caused by a solar flare hits earth and renders all technology useless. How do people relying on electricity, water, heating and medicine supplies being delivered survive?David is visiting his parents in Kenton, a smaller town, when disaster hits - he's stuck in Kenton, with cars, mobiles etc not working and

no means to check up on his wife and daughter who stayed in the city. Seeing how the town rallies together, how they cope facing nearly impossible obstacles, what it takes to survive will keep the reader glued to the book until the last page. Although the tale is not told in the nail-biting style of similar end-of-times books, or films, the plot and the sort of matter-of-fact narration style will keep the reader interested without cliffhangers at end of chapters. Seeing David's character develop, and those of his friends and families, seeing how they deal with the crisis and the aftermath of a new society, and rules of surviving developing, leads to a book that will make you think and possibly re-consider some values. Definitely a must-read, and I hope there will be (or is?) a follow-up. 0 von 0 Kunden fanden die folgende Rezension hilfreich. Amazing! Von Semtex Just like the last book I read from this author I was hooked and could not put it down. I have read a lot of prepper books thru the years but this had a really interesting plot, it was different. I look forward to finding more books of his to read. Please release the sequel soon.

Kurzbeschreibung In a flash of searing light, the world changed. A massive solar flare has crippled the modern world and brought chaos and destruction. David Hartsman is stuck in the remote farm town of his youth on what was expected to be a short visit to check on his ailing parents. While his wife and his daughter are hundreds of miles away at home in Chicago, David must face the dangers associated with his own survival and the pressures of not being with his family. In a worldwide catastrophe, every struggle is personal. EMP is the dramatic story of one man and his struggle for survival in a world that is falling apart. **Kurzbeschreibung** In a flash of searing light, the world changed.
