Historical mystery that is fun to readVon Ein KundeIn 1924 England, the separation between the social classes was so

wide, most citizens believed that one should marry within one's class. Deputy Constable Alec Fletcher is not so sure that perspective is incorrect, but he cannot give up his fiancée Daisy Dalrymple just to satisfy conventional wisdom. The honorable Miss Daisy does not give a fig about social class distinctions as she plans to marry into the middle class. Unlike most blokes of the period, Alec appreciates Daisy's independence and fully supports her need for a career writing magazine articles. However, at the same time he wishes she would stay outside of his homicide cases. Daisy wants to comply, but fate seems to keep pushing murdered bodies along her path. She currently works in the London Museum when she finds the corpse of the Keeper of Mineralogy impaled on a dinosaur bone. Daisy later learns that a fortune in jewels is also missing. Unable to resist, Daisy starts snooping, which places her in danger from the killer and sends Alec towards a potential stroke from her latest involvement. The eighth installment in the Daisy Dalrymple series, *RATTLE HIS BONES*, contains the humor of a sitcom that makes it more enjoyable than the entertaining previous seven. Daisy and Alec are an adorable couple, whose enlightened outlook helps them transcend the loud objections to their relationship. The era and the crime scene provide an ideal locale for Carola Dunn's first class story line while the ending is perfect for those readers who relish a well designed puzzle. The author has done historical mystery fans a big favor with this wonderful tale.

Sehr viel dichter als ihre anderen Bcher, gut recherchiert und hoch spannend, trotz der rgerlichen Schriftgrssenwechsel, wie leider auch schon in einigen der vorhergehenden Bnden. Dennoch sehr unterhaltsam, mit additivem Charakter.

Als langjhriger Miss-Daisy-Fan war ich ganz glcklich ber das reiche Kindle-Angebot. Ideales, gemtliches Krimi-Lesefutter. Dieser hier spielt in London, das fand ich besonders gelungen.

Kurzbeschreibung In the summer of 1923, the Honourable Daisy Dalrymple makes what should be an uneventful research trip to the Museum of Natural History with her nephew Derek and her soon-to-be step-daughter Belinda in tow. But as she interviews the various curators for her article on the museums of London, she soon discovers that the Museum of Natural History is a hotbed of professional rivalry and jealousy, particularly between Dr. Smith Woodward, the Keeper of Geology - responsible for the fossil collection, and Dr. Pettigrew, the Keeper of Mineralogy - responsible for the Museum's fabulous gem collection. On a later trip, as closing time nears, Daisy hears two voices followed by a tremendous crash and rushes into the next hall to discover Dr. Pettigrew dead - murdered amidst a pile of dinosaur bones. Daisy's fiancée, Detective Chief Inspector Alec Fletcher of Scotland Yard, is assigned to investigate and together they must unravel a most baffling case of missing gems, dispossessed European royalty, professional rivalry and murder most foul.

Pressestimmen "The satisfying climax comes, fittingly enough, on a foggy London evening. Dunn's witty prose shines in this lighthearted whodunit."
