Von Kathleen Collins : Realm Walker before purchasing it in order to gage whether or not it would be worth my time, and all praised Realm Walker:

Glad I stumbled upon the start of this pretty cool UF series!Von MinaSynopsisIn a world with mages, fae, vampires, werewolves and a lot more supernaturals [aka "Altered"] openly living among humans, Juliana Norris works for the

Agency. In her job as a Realm Walker, she solves crime cases and takes care of overall s*** hitting the fan, whenever Altered are concerned. Juliana is someone special herself: part dark fae, part mage and something more in the mix nearly no one knows about. And besides having no memory of the first 12 years of her life, she from there on was raised by a vampire coven. When the master vampire Thomas Kendrick, who broke her heart seven years ago comes back pursuing her and a demon is summoned who is far too interested in her and goes from one killing-spree to the next, times get even rougher for Juliana. Now she is avoiding one powerful vampire with an attitude and hunting one powerful demon who threatens the people she holds dear. Good times are something else. Review Oh that was so cool! The secret of who and what Juliana is and what happened to her is only shown in slight glimpses and it takes the whole book to get at least the basics. But strangely that did not annoy me, instead the absolute opposite happened: I was so interested in Juliana's story and her world, I forgot all around me. And she has a hell of a story! And the return of her one-time lover and all the hot scenes between them [there is a blood-donation scene that made my knees go weak, mark my words] notwithstanding, this is UF. Of the gory and brutal kind. In her capacity as a Realm Walker, Juliana fights a lot and the demon is creative when it comes to torture and killing, so be aware of that - this is no story for the faint of heart. Since that didn't disturb me [I wonder what that says about me] in UF, I was thinking that this book would make a good movie, because it all is so vividly described. Kathleen Collins does not only tell stories, but creates pictures in the mind [even if the predominant colour is blood-red]. As I said, I was immediately fascinated by Juliana and liked her a lot. I'm still getting used to "her" vampire Thomas Kendrick, though. I get his reasons and all and following his 3rd person POV for several chapters surely helped getting along his point. But I do object to the "I'm the master vampire, everybody obey me now!"-attitude. Good thing, Juliana does, too. The other characters are not as thoroughly fleshed out, but well enough to convey the differences between them and the overall feeling of community, Juliana feels around her friends and colleagues. And I guess there will be greater detail in the next installments. Oh and I adore Juliana's father, once his identity is revealed. To finish this: the case at hand was mostly solved, but there will be consequences and repercussions in following books after what Juliana did, of that I'm sure. And I'll be reading along!
