**Von Robert Ludlum, Jamie Freveletti : Robert Ludlum's The Geneva Strategy (Covert-One)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Robert Ludlum's The Geneva Strategy (Covert-One):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Big disappointmentVon Vater\_KaterThis is my fifth book in the Covert-One series. While the series has its ups and downs, it is the first one I could barely finish. The plot is convoluted and confused, the characters are one-dimensional

and, particularly, the action sequences wholly unrealistic both regarding how the action unfolds and how the characters act and behave. It is also very clear that the author neither has a military background nor has done much research. A lot of the book feels like a worse reimagining of a bad TV show.0 von 0 Kunden fanden die folgende Rezension hilfreich. Jon Smith Von Robert Lamb Great storyline, great tempo. Hope you enjoy the book as much as I did. The Robert Ludlum books are just some of the best around. Buy this as soon as possible you will not be disappointed. Once again great book.

Kurzbeschreibung One evening in Washington, DC, several high-ranking members of government disappear in a mass kidnapping. Among the kidnapped is Nick Rendel, a computer software coding expert in charge of drone programming and strategy. He is the victim with the most dangerous knowledge, including confidential passwords and codes that are used to program the drones. If revealed, his kidnappers could reprogram the drones to strike targets within the United States. Jon Smith and the Covert-One team begin a worldwide search to recover the officials, but as the first kidnapping victims are rescued, they show disturbing signs of brainwashing or mind-altering drugs. Smith's investigation leads him to Fort Detrick, where a researcher, Dr Laura Taylor, had been attempting to create a drug to wipe memory from soldiers suffering from post-traumatic stress syndrome. But Dr Taylor's research was suspended almost a year ago, when she was placed in a mental institution. Now, if Smith doesn't figure out the brainwashing drug, and track down the kidnapped Nick Rendel, the kidnappers will soon have the power to carry out drone strikes anywhere in the world...
