Very moving book!!!Von 5171Miles (Sabrina)Summer and I are only a few years apart by age but this is the very reason I can fully relate to her mid-twenty struggles. Society expects us to have life figured out by our early twenties, heck, maybe even after school graduation. We have to know what to we want to study and what job we want afterwards. But the truth is that most young people in their twenties don't have it figured out. At least I haven't. I often think "Is my course of studies really what I want in life? Do I really want to work in that industry for the next 40 years?" Why can't society let us make mistakes? Why can't we travel for a few years? Why do we have to settle for one course of studies

at the age of 18/19? Why can't we try a few and see what suits us best? Why does society pressure us so much? But most importantly: why is it so important for the society that we have to have it figured out so early? There were so many scenes in this book I could relate to 100% and I am so happy that someone finally wrote about it. "Your twenties are definitely a weird age. Children in adult bodies being forced to make adult decisions with their child brains." I could tell you more about strong and smart Summer, cute, attentive and swoon-worthy Cooper and Summer's really annoying best friend. But I don't, I rather want to let you know about all the different and random things this story made me think of: cruise ship captains, windows and eyes, coincidences and accidents and the amount of how many seconds there are during the summer. I know that all this makes no sense to you at all, but it will if you read the story. I don't know how Seth King did it but I was sitting there and thinking to myself "Why have I never thought about this? He's so right!" I like when books make me think about things, even the most random and obvious ones. I think Seth King's *The Summer Remains* is more than just a novel. He created a wonderful yet heartbreaking story about a girl with a not well-known medical condition (no, it's NOT cancer), about wanting to fall in love and making the readers aware of so many random but also important things. 0 von 0 Kunden fanden die folgende Rezension hilfreich.
